

Steps to a Successful Sausage Fund Raiser

1. Have your customer fill out the amount of sausage desired.
Have them place their order in 3 lb. or 5 lb. increments.
eg. 3 lb of Elk and Pork Sausage and 15 lbs of Beef Sausage.
This simplifies the packaging process.
2. Inform your customers of when and where they can pick up their order
or make arrangements with them if you will be picking up their order for them.
Please remind them to be prompt so that their sausage can be refrigerated as soon as possible.

3. Please return your order forms once you have completed selling
to _____ by this date _____

All order forms will then be submitted to Premium Sausage and will be returned when the packaging is completed.

4. Collect from your customer the amount stated on their package.
It is preferable to collect the money upon delivery versus when the order was placed due to the fact that it is difficult to package the exact poundage to the penny.
